

## Expertise and Services

With several years of professional experiences in the fields of journalism, research and information technology complemented by a multi-cultural perspective, I am able to provide in-depth consultancy and quality services for high profile clients and associates ranging from startup projects to multi-national corporations and organizations.

### Journalism

I have worked and was featured in a documentary film for CNN about the city of Cairo. I wrote numerous published articles in both English and Arabic language. I have been a guest speaker in several TV shows. I worked ca. three years as full-time editor ...

### Research

I started my research work in 1991 as a research assistant for graduation research projects. Then I worked as an associate researcher in various research projects for different universities including Cairo University, American University in Cairo, Humboldt ... [\[Read More...\]](#)

### Internet

My work in information technology and the Internet was introduced to Egypt. It was the foundation of my Internet career. I was working in IT - while I was still in computer hardware sales ...
